Vectron MOBILE APP

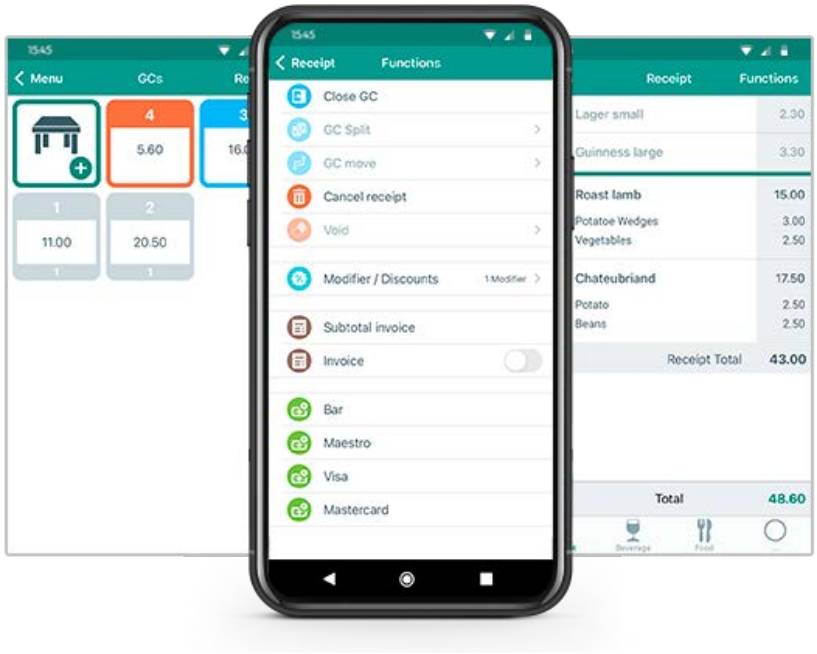
The new “Vectron MobileApp” is so easy to operate that you will be familiar with all the functions within minutes. At the same time the app provides you all the comfort you require for mobile cashing.

- Clearly arranged
- Intuitive
- Easy to operate
- Offline-capable

The app functions have been deliberately reduced to the essential ones for mobile cashing. This makes the app clearly arranged and easy to operate.

More complex transactions can be carried out via the stationary Vectron server system, which is required for using the app. It is also possible to integrate the app later into existing installations and to book it on a monthly basis. This allows using it only during the summer for example.

The Vectron MobileApp is available for free download from the "App Store" and "Google play" and you can test it in demo mode without registration.



from monthly 39.80 €

end user

myVectron Reporting-APP

The myVectron-App includes the following evaluations:
- Daily sales company-wide and branch-related, incl. values of the reference day
- Number of previous invoices / customers
- Sales forecasts, trends and extrapolations incl. graphics
- Sales development on hourly basis as chart plus display of best, worst and average hour incl. comparison to previous week
- Shop list: List of all branch shops with important key figures, current trend and expected total daily sales
- Number and performance of operators
- Company-wide TOP 10 of PLU sales by sales, count and percentage in total sales
- Sales difference between TOP 1 and TOP 5 product
- Display of bestseller product by branch
- User-defined watch list for 10 PLUs
- Open sales/GCs company-wide and branch-related
- Access to historic data with extensive filter options

Charts on branch shop basis:
- Daily sales
- Invoices
- Sales per operator
- Sales per invoice
- Sales ranking of all operators
- Sales ranking of all products
- Sales of one product per hour

The App provides default periods, i.e. current day/week/month/year and yesterday/previous week/previous month/previous year.

Furthermore you can display the individual data of a selected day, week, month or year.
