

VECTRON

The New Generation POS 7

Flexible High-End POS System

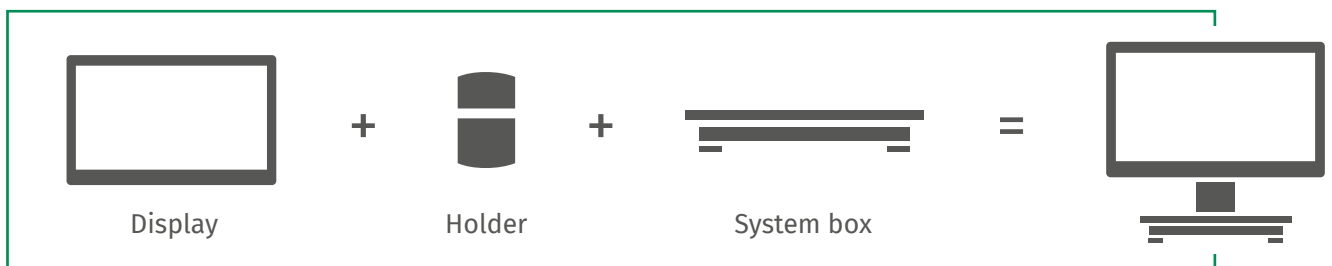

Our new hardware generation

Flexible High-End POS System

Thanks to the new modular system the new hardware offers a wide range of setting options and can be flexibly customized for your requirements. It also boasts a convincing modern and functional design.

We also offer the POS 7 PC as additional variant. For optimum convenience, you can also use the PC system to process e-mails and menus, manage table reservations, play music and use all the common internet applications.

Modular concept

The system box can be easily separated from the rest of the hardware and can thus be mounted under the counter, for example. This facilitates the handling of cables and provides the option for pole or wall mounting.

POS 7

Slim design with high-quality metal housing

The extra wide display offers space for numerous functions at a glance. The capacitive glass touch screen is energy-saving, wear-free and equipped with a swipe function. You can adapt and program the flexible, powerful software according to your requests; ergonomic design and a touch screen ensure convenient operation. Several industry-specific programs and peripheral devices can be connected to the POS 7 for optimum workflows. Also available with smaller display as POS 7 Mini.
